HERE'S HOW 7,500,000 WORKERS ARE DOING IT

More than 20,000 companies now maintain the Payroll Savings Plan, by which their employees invest in U. S. Savings Bonds automatically every pay day. This Plan builds security not only for the individual employees, but for their companies and for the nation!

As you know, Savings Bonds pay \$4 at maturity for every \$3 invested. Thus they help create a "rainy-day" fund for each Payroll Saver, increasing his security.

How P. S. P. helps employers

America's leading corporations report these company benefits from the Payroll Savings Plan: As Bonds increase the worker's economic peace of mind, plant morale improves. Production increases—because absenteeism, labor turnover, and the accident rate all decline. Relations improve between employer and employee.

Savings Bond dollars are dollars removed from the spending stream. They are deferred purchasing power—an assurance of good business during the years to come. The Treasury uses net Savings Bond dollars to

help reduce inflationary credit potential in the banking system by retiring short-term bank-held Federal securities. So Bonds increase the *nation's* economic security, too!

Proof that employees want P. S. P.

Practically everybody wants to save. Every one of your employees could be saving more if he were obtaining Savings Bonds regularly, right where he works. Even with today's high prices, it has been proved that between 40% and 60% of America's, working millions—at any wage level—can and will buy Bonds through Payroll Savings if management sponsors the Plan and if a fellow worker asks them to sign up.

Yes—your employees want to help you build security—for all of us. It's up to you whether they get the chance. All the help you need is available from your State Director, U. S. Treasury Department, Savings Bonds Division. While it's on your mind, why not call him? Or write the Treasury Department, Washington 25, D. C.
